

CHILD PROTECTION PROGRAM

Dear Parents and Caregivers,

In 2019 the Child Protection component of Personal Development, Health and Physical Education (PDHPE) will be conducted by the class teacher. The program comprises of lessons which vary in length from 10 to 30 minutes, depending on the grade and length of discussion required. Some lessons are supported by photocopied worksheets, particularly in the junior classes.

The precise content of lessons teaches students protective behaviours. It is important to note that the program requires the use of precise anatomical terms for all parts of the body. Any concerns can be discussed with your child's teacher.

While it is compulsory for the school to present this component of PDHPE, parents must give permission for their children to participate in the lessons.

Parents are required to complete the attached permission slip and return as soon as possible. Please complete one slip for each child in your family.

Yours sincerely,

Mrs Carol Frith
Principal
